Two-year-olds like to be independent! Favorite words are “Mine!” and “No.” and “I do it!” Emotions may take on a roller coaster-like quality, changing from excitement to anger to laughter within a few moments. A great deal of time is spent exploring, pushing, pulling, filling, dumping, and touching.

2-YEAR-OLDS

Growing and Moving

WEIGHT: 22-38 pounds
HEIGHT: 32-40 inches
- feeds self with spoon
- has almost a full set of teeth
- puts on hat, socks, mittens
- opens cabinets and drawers
- holds crayons with fist and scribbles
- walks without help
- stoops or squats
- can bend over to pick up a toy without falling
- tosses or rolls a large ball
- likes to climb onto and off furniture
- walks up and down stairs by holding onto railing
- likes to push, pull, fill, and dump
- many children (but not all) will become interested in using the toilet

Thinking and Learning

- learns by touching, smelling, and tasting
- knows and can say name
- follows simple 2-step directions
- points to eyes, ears, or nose when asked
- laughs at silly actions
- acts out every day activities — talking on phone
- likes to take things apart
- unable to sit still or play with a toy for more than a few minutes
- stacks 2-4 blocks

IOWA STATE UNIVERSITY
Extension and Outreach
Listening, Talking, and Reading

- says names of toys and other objects
- repeats words heard in conversations
- uses 2-4 word sentences, “Go home!”
- asks for information by pointing and using one word, “Doggie?”
- enjoys simple stories, rhymes, and songs
- hums or tries to sing
- enjoys looking at picture books and turning pages
- points to and says names of objects in books

Feeling and Relating

- plays more “alongside” rather than “with” other children
- acts shy around strangers
- likes to imitate parents
- easily frustrated; impatient
- affectionate—many hugs and kisses
- insists on trying to do several tasks without help
- very possessive—offers toys to other children, but then wants them back
- sometimes throws tantrums or bites, usually when unable to say or ask for something in words
- possessive of adult attention; shows feelings of jealousy
- wants to explore, but still needs you as a base of support and trust
- enjoys laughing, beginning to develop a sense of humor

LET’S TALK!

Ideas to help children build communication skills

Recognize and encourage children’s effort. Learning new skills takes a lot of practice. A little encouragement helps children feel more confident about trying new things. Two-year-olds don’t talk a lot yet, so you will need to pay close attention and talk to them through challenges. “Learning how to go down the stairs takes some practice, but I know you can do it. Try holding the rail with both hands.”

Toys

- large blocks
- push toys, shopping cart, lawn mower
- cars and trucks (large)
- pegboard with large pegs
- toy telephone
- tricycle, rocking horse
- water and sand toys
- table and chairs, play dishes
- simple dress-up clothes
- shape blocks, 3-4 piece puzzles
- small and large balls
- doll with bottle and blanket
- nursery rhyme music and books
- large crayons
- stuffed animals, wooden animals

Try holding the rail with both hands.”
A Word on Development

Every child is unique. Each child’s learning and growth rates may differ slightly from other children the same age. If, however, you notice a child is unable to do many of the skills listed for his or her age group, you may wish to talk with a health professional. In Iowa, you may request a free evaluation and assessment from Early ACCESS at 1-888-425-4371. www.iafamilysupportnetwork.org/early-access-iowa

If your child has special needs, early help can make a difference.

IDEAS FOR GROWTH AND DEVELOPMENT

• Baby proof—AGAIN! Two-year-olds are now taller and more skillful at opening doors and getting into mischief.
• Spend some time rolling a ball back and forth to each other. Show children how to drop and toss a ball into a large container.
• Provide toys for pushing and pulling.
• Play “parade” or follow the leader. Sing and act out songs like “Old MacDonald.”
• Help toddlers learn about the science of “what happens when?” Provide many opportunities to fill, dump, collect, gather, give, hide and seek.
• Encourage drawing and painting to support later writing skills. Tape paper to the table and let children practice scribbling with crayons and markers.
• Encourage your child to identify words and noises—vacuum, water dripping, dogs barking, thunder, airplane.
• Read aloud to your child every day. Snuggle up and read books with fewer words and large pictures.
• Encourage language by adding new words and having back-and-forth conversations. “Yes, that’s a car, a shiny, red car. Where do you think it is going?”
• Let your child help with simple chores. Placing fruit in the fridge, picking up toys, or putting clothes in the laundry basket are good choices. Encourage your child to name things you are using.
• Give toddlers clear and simple choices. “Do you want milk or water? Do you want the big ball or the little ball?”
• Know how to handle a temper tantrum—don’t yell, shake, or hit a child; remain calm; and talk in a soothing tone.
• Do not expect toddlers to share or take turns. Right now they are focused on learning how to physically handle themselves and on learning to talk. Learning to share will come later.

Books for Children

- Baby Beluga
  Raffi
- Freight Train
  Donald Crews
- From Head to Toe
  Eric Carle
- Good Night, Gorilla
  Peggy Rathmann
- Hands Are Not for Hitting
  Martine Agassi Ph.D. and Marièka Heinlen
