Check your $-saving skills:

1. The most economical source of protein is:
   a. Eggs
   b. Ground beef
   c. Dried beans
   d. Canned beans
   e. Peanut butter
   f. Walnuts

2. How many pounds of pork chops do you need to serve 3 people?
   a. 1 pound
   b. 2 pounds
   c. 3 pounds

3. The only nutritional difference between canned and dried beans is that canned have more sodium.
   a. True
   b. False

4. Buying the lowest cost ground beef is always the best choice.
   a. True
   b. False

5. Which of the following has the lowest price per pound?
   a. 10-ounce package of sliced turkey meat for $3.49 per package
   b. Sliced turkey at the deli counter for $4.99 per pound
   c. 2½ pounds of fully cooked lean ham for $8.73

(Answers on next page)

No endorsement of mentioned products or firms is intended nor is criticism implied of those not mentioned.

All prices in this publication were collected in central Iowa, Summer 2014. Although prices vary depending on date and location, the comparative differences generally follow a similar pattern.

Protein

All foods made from meat, poultry, seafood, beans and peas, eggs, processed soy products, nuts, and seeds are considered part of the protein food group. MyPlate and the Dietary Guidelines for Americans recommend 2 to 5 ounces of protein foods per day for children; teens and adults need 5 to 6½ ounces.

Each of these provides a 1 ounce MyPlate protein equivalent:

<table>
<thead>
<tr>
<th>Description</th>
<th>Price per ounce</th>
<th>Portion Size</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 ounce cooked meat, poultry, or fish</td>
<td>$0.38</td>
<td>12 ounces @ $4.59/pound</td>
</tr>
<tr>
<td>½ ounce nuts or seeds</td>
<td>$0.25</td>
<td>1 pound walnuts @ $7.99 ÷ 32</td>
</tr>
<tr>
<td>1 medium egg</td>
<td>$0.13</td>
<td>1 dozen @ $1.59 ÷ 12</td>
</tr>
<tr>
<td>¼ cup cooked beans, peas, or lentils (canned)</td>
<td>$0.13</td>
<td>1 (15-ounce) can @ $.89 (7 ¼-cup servings)</td>
</tr>
<tr>
<td>¼ cup cooked beans, peas, or lentils (dried)</td>
<td>$0.04</td>
<td>1 pound (dried) @ $.99 (20 to 28 ¼-cup servings)</td>
</tr>
<tr>
<td>1 tablespoon peanut butter</td>
<td>$0.10</td>
<td>18 ounces = 32 tablespoons @ $3.28</td>
</tr>
</tbody>
</table>

Eat Smart: practice portion control

Cooking more than a 2- to 3-ounce portion of meat per person encourages us to eat more than we need for good health. Because meat is often the most expensive part of the meal, filling up on meat can challenge your food budget.

The amount to buy for your family depends on the amount of bone or fat the meat contains.

- **One pound serves 4 if it has no bones or fat:**
  - ground beef, stew meat, cubed steak, boneless ham, fish fillets, luncheon meat
- **One pound serves 3 if it has some bones and fat:**
  - pork chops, chuck roast, picnic ham, turkey parts, bone-in fish
- **One pound serves 2 when it has many bones or more fat:**
  - whole chickens and turkeys, spare ribs, ham hooks

Making hamburgers for your family of 3?

Plan ¼ pound per person or ¾ pound for a family of 3. If you buy a pound package, either freeze ¼ pound for another meal or cook it all and save one portion for another meal.

Serving a roast to 4 and want planned leftovers?

Purchase enough for 8 servings, such as a chuck roast that is about 2½ pounds. Set aside the extra portions and serve only the amount to be eaten at the meal.
Spend Smart: stretch your meat and poultry

Practice your meat-stretching artistry
• Mix meats with beans, lentils, rice, pasta, and vegetables.
• Use beans or a mixture of beans and ground beef in tacos.
• Make stir fry and use only ½ to ¾ as much as in a typical meat serving.
• Add rice to meat balls; bread crumbs or oatmeal to meatloaf.

Choose either dried or canned beans
• Both canned and dried beans make good meat substitutes and provide the same amount of fiber, protein, and other nutrients.
• Dried beans are less expensive but take more planning to use.
• Canned beans have more sodium (800 mg per cup compared to 5 mg per cup for dried). If you are concerned about sodium but like the convenience of using canned beans, you can drain and rinse the beans to remove about 40 percent of the sodium.

Watch for sale prices
• Check store ads to see what meats are on sale and base meals on them.
• Stock up—if you have the freezer space to do so. Meat and poultry, including unopened vacuum packages, can be frozen in their original supermarket packaging. If storing more than a month or two, place the store package inside a freezer-weight plastic bag or overwrap it with airtight heavy-duty foil, plastic wrap, or freezer paper; label with contents and date.

Spend Smart: rinse higher-fat ground beef to reduce fat
Buying ground beef with a high percentage of fat is usually less expensive per pound but it yields less meat. However, you can save with the cheaper ground beef if you rinse and drain it after browning.

Follow these easy steps to remove excess fat when cooking ground beef for spaghetti sauce or other uses.
1. Drain fat from skillet after browning meat (photo 1).
2. Use a slotted spoon to transfer beef to a plate lined with paper towels. Let sit 1 minute; blot top of beef with more paper towels (photo 2).
3. Place beef in a fine mesh strainer or colander set on a sturdy ½-quart (or larger) bowl (photo 3).
4. Pour 4 cups very hot water over beef to rinse fat. Drain 5 minutes.
5. Use rinsed beef as desired (or freeze for later use). Chill the bowl of waste water.

Answers:
Check your $-saving skills
1. Lowest to highest: dried beans, peanut butter, canned beans, eggs, walnuts, ground beef
2. 1 pound
3. True
4. False—lowest cost often has highest fat content; use it for crumbles that can be drained.
5. The lean ham costs only $3.49 per pound; ask the meat department to slice it thin. The 10-ounce prepackaged turkey costs $5.58 per pound. ($3.49 per 10 ounces = $.35/ounce x 16 ounces/pound = $5.60).
