

Planting and harvesting times for garden vegetables

This guide will help you schedule the planting of gardens so space may be used efficiently. Designed for central Iowa, dates for southern Iowa would be about 1 week earlier, for northern Iowa about 1 week later. For more information on planting a vegetable garden, see PM 819, *Planting a Home Vegetable Garden*.

Radishes—Several plantings, 7 to 10 days apart, are possible. Radishes pass peak quality quickly, so several plantings are needed to provide high quality radishes throughout the spring and early summer. Radishes become spongy and form seed heads with the onset of hot weather. Fall plantings can be made from mid-August to mid-September.

Lettuce—Sow seeds in early spring. Lettuce flowers and turns bitter with the onset of hot weather. Fall plantings can be made in August.

Onions—For mature (dry) onions, sow seeds in early to mid-April. Plant sets and plants from early April to May 1. Plantings for green onions can be made from early April to mid-summer.

Peas—Sow seeds in early spring as soon as the soil can be worked. Plants stop bearing when hot weather arrives. A fall planting may be made about August 1 to 10.

Spinach—Sow seeds in April as plants become bitter and form seed heads with the onset of hot weather. A fall crop may be planted about August 10.

Cabbages—Set out transplants from early April to May 1 for a summer crop. Direct seed in summer for a fall crop.

Broccoli and cauliflower—Set out transplants in early to mid-April. Both are sensitive to hot weather so need to be encouraged to head as early as possible.

Collards and kale—Seed at the same time as lettuce and other early spring crops. Direct-seed in early July for a fall crop.

Carrots—Seeds can be sown from early April to August 1. Plant every 3 to 4 weeks for a continuous harvest.

Beets and Swiss chard—Seeds can be sown from early April to August 1. Plant every 2 to 3 weeks for a continuous harvest.

Potatoes—Best planted in early to mid-April; a long growing season is needed to produce full-sized tubers.

Turnips—Sow seeds in April and again in August or early September for a fall crop.

Snap beans—Plant any time after May 5. Most varieties will keep producing if plants are kept picked. Last practical date for planting is August 1.

Sweet corn—Plant when soil temperature reaches 60°F or any time thereafter. Last practical date for planting an early variety is July 1.

Lima beans—Plant from May 20 to June 30 to produce a crop by average frost date.

Tomatoes—Plant seedlings in mid-May. Last practical date for planting tomatoes is June 20.

Peppers and eggplants—Plant seedlings in mid-May. Last practical date for planting peppers and eggplants is June 20.

Summer squashes—Seed mid-May. If harvested every other day, plants will keep producing until frost. Last practical date for seeding is July 20.

Cucumbers—Seed mid-May. Production is continuous if kept picked. Last practical date for seeding is July 20.

Muskmelons—Seed mid-May. There are varietal differences in the length of time from planting to harvest. Last practical date to sow seeds of early maturing varieties is June 20.

Winter squashes and pumpkins—Seed mid-May. A full growing season is needed to produce mature fruit that keep well into winter.

Watermelons—Seed mid-May. There are varietal differences in the length of time from planting to harvest. Last practical date to sow seeds of an early maturing variety is June 20.

Guide to vegetable planting and approximate harvest period

Crop	Month						
	April	May	June	July	Aug.	Sept.	Oct.
Radish	[Growth bars from April to Oct.]						
staggered plantings	[Growth bars from April to Oct.]						
Lettuce (leaf)	[Growth bars from April to Oct.]						
Lettuce (head)	[Growth bars from April to Oct.]						
Onions (dry)	[Growth bars from April to Oct.]						
Peas	[Growth bars from April to Oct.]						
Spinach	[Growth bars from April to Oct.]						
Cabbage	[Growth bars from April to Oct.]						
Broccoli and cauliflower	[Growth bars from April to Oct.]						
Collards and kale	[Growth bars from April to Oct.]						
Carrots	[Growth bars from April to Oct.]						
2nd planting	[Growth bars from April to Oct.]						
3rd planting	[Growth bars from April to Oct.]						
4th planting	[Growth bars from April to Oct.]						
Beets and chard	[Growth bars from April to Oct.]						
2nd planting	[Growth bars from April to Oct.]						
3rd planting	[Growth bars from April to Oct.]						
Potatoes	[Growth bars from April to Oct.]						
Turnips	[Growth bars from April to Oct.]						
Snap beans	[Growth bars from April to Oct.]						
2nd planting	[Growth bars from April to Oct.]						
Lima beans	[Growth bars from April to Oct.]						
Sweet corn	[Growth bars from April to Oct.]						
2nd planting	[Growth bars from April to Oct.]						
3rd planting	[Growth bars from April to Oct.]						
Tomato	[Growth bars from April to Oct.]						
Pepper and eggplants	[Growth bars from April to Oct.]						
Summer squash	[Growth bars from April to Oct.]						
Cucumber	[Growth bars from April to Oct.]						
Muskmelon	[Growth bars from April to Oct.]						
Winter squash	[Growth bars from April to Oct.]						
Pumpkins	[Growth bars from April to Oct.]						
Watermelon	[Growth bars from April to Oct.]						

Planting times and approximate dates to harvest for central Iowa. Dates for southern Iowa about 1 week earlier; northern Iowa about 1 week later. Factors that cause variation in planting and harvesting times: lateness of spring, maturity of vegetables, onset of hot weather, fall frost date, average temperatures, wetness, dryness, etc.

Prepared by Richard Jauron, extension horticulturist.

...and justice for all
 The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250-9410, or call 800-795-3272 (voice) or 202-720-6382 (TDD). USDA is an equal opportunity provider and employer. Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Cathann A. Kress, director, Cooperative Extension Service, Iowa State University of Science and Technology, Ames, Iowa.
