A Resource Guide for BEGINNING FARMERS

An informational resource manual for beginning and aspiring Iowa farmers.

The curriculum in this manual is divided into three parts: production practices, post-harvest handling, and business planning/basic finances. Each module is organized by learning objectives and includes narrative, hands-on activities, and links to worksheets and additional resources.
A Reference Guide for
BEGINNING FARMERS

What is the purpose of this publication?
The idea for this curriculum for beginning farmers came from the increasing interest in establishing incubator farms throughout Iowa. As outreach staff at a land-grant university, our role is to assist in creating educational materials for use by these training farms. Iowa State University offers a wealth of information on farming practices and strategies; this publication is a compilation of existing resources into a complete curriculum.

This guide provides useful modules for people who want to start farming. The structure was chosen after reviewing curricula from over a dozen incubators and other farm training programs from across the country. Most topics are geared toward fruit and vegetable growers and additional modules may be added depending on user interest-on topics such as livestock management.

Acknowledgements
We wish to thank the following individuals whose time and input helped shape this manual. From Iowa State University: Georgeanne Artz, assistant professor; Diana Cochran, assistant professor; Susan DeBlieck, program assistant; Kathleen Delate, professor; Alan Gaul, seed specialist; Mark Hanna agricultural engineer; Joe Hannan, field specialist; Christa Hartsook, small farms program coordinator; Ajay Nair, assistant professor; Patrick O’Malley, field specialist; Leah Riesselman, graduate assistant; Lina Rodriguez Salamanca, plant pathology diagnostician; Denny Schrock, horticulture lecturer; and Cathy Strohbehn, assistant professor. From our partners: Toby Cain, Seed Savers; Steve Carlson, Practical Farmers of Iowa; and Rex Dufour, National Center for Appropriate Technology (NCAT).

The publication was prepared by Alice Topaloff, with support from Iowa State University Extension and Outreach Local Foods Team and the Leopold Center for Sustainable Agriculture. For more information or suggestions for additional publications, contact Alice at toppoloff@iastate.edu.

Cover photos by romrodinka/iStock.com, Jupiterimages/Creatas.com, and Ajay Nair. Inside front and back cover photos by Jane Lenahan.
Who is this publication for?
People interested in hosting a farmer training program (incubator or other) will find the resources in this publication useful to teach a Beginning Farmer Training program.

A beginning farmer will find this publication as a useful guide to locating existing resources. This curriculum presents an overview of what other beginning farmer training programs offer and where to find the appropriate information.

What is an incubator farm?
Among the main barriers to starting a farm business are lack of capital (land, equipment, inputs) and experience (formal training, hands-on experience). Farm incubators offer a way to overcome both barriers. These multi-farmer operations allow each farmer to rent a small plot. The rent includes access to land, training and technical guidance (from service providers, established farmers, or on-farm staff), as well as marketing assistance. At the end of the “course” (usually a 3- to 5-year period), the farmer should be able to transition to a plot of his/her own, having acquired the skills, knowledge and expertise necessary to start farming successfully.

How is this curriculum structured?
The curriculum is divided into three modules:
1. Production practices,
2. Harvest and post-harvest handling, and
3. Business planning and basic finances.

Each module is organized by learning objectives, and includes narrative, hands-on activities, when applicable, as well as links to worksheets and additional resources.

TOPIC A: Production

The objective of this section is to give the trainee a general overview of production practices, from basic plant biology to managing soil fertility and growing successful crops. The ultimate goal is for the beginning farmer to have all the tools necessary to create a holistic and logical “Whole Farm Plan.”

Modules
Module 1: Soil
Module 2: Composting
Module 3: Basic plant biology and nutrient management
Module 4: Irrigation systems
Module 5: Field preparation and planting
Module 6: Insect control and entomology
Module 7: Weed management
Module 8: Disease control and plant pathology
Module 9: Season extension
Module 10: Cover cropping
Module 11: Small farm equipment
Module 12: Whole farm planning

Additional resources
Growing Organic Vegetables in Iowa, ISU Extension and Outreach, includes strategies for composting, fertility management, pest management, and disease management. store.extension.iastate.edu/Product/Growing-Organic-Vegetables-in-Iowa

Midwest Vegetable Production Guide for Commercial Growers is used as a reference by many commercial-scale vegetable growers, and combines resources from seven Midwest land-grant universities. www.btny.purdue.edu/Pubs/ID/id-56/
MODULE 1: Soil

Narrative

Soil Management Basics, New Farms for New Americans. This simple presentation covers the basics of soil management, including soil fertility, management practices, pests and diseases, and information on organic versus conventional agriculture.

http://nesfp.nutrition.tufts.edu/resources/organic-production-and-soil-management

Hands-on activity

General field observations:
- Nutrient deficiency symptoms: Do crops show signs of stress or stunted growth during wet or dry periods?
- Is the soil compacted? Does it plow up clody and take a lot of secondary tillage to prepare a fine seedbed?
- Does the soil crust over easily, or are there signs of runoff and erosion?

Test a soil sample using methods learned (see page 274 in SARE's publication* on soils for examples). Discuss how it can be improved (see page 286 in SARE's publication* on soils for examples).

Worksheet

- Garden Soil Management, Henry Taber, ISU Extension and Outreach. To manage soil more effectively, learn about tillage, integrating organic matter, soil testing and pH, fertilizer application and more.
  store.extension.iastate.edu/Product/Garden-Soil-Management

Additional resources

- Building Soils for Better Crops, 3rd edition, SARE*. A reference on ecological soil management. It provides step-by-step information on soil-improving practices as well as in-depth background ranging from what soil is to organic matter.
  www.sare.org/Learning-Center/Books/Building-Soils-for-Better-Crops-3rd-Edition

- Soil and Land Use, ISU Extension and Outreach. Contains data on Iowa's soil.
  www.extension.iastate.edu/soils

- Soil Sample Information Sheet for Horticulture Crops, ISU Extension and Outreach. Download this publication to submit soil samples for analysis at the ISU Soil Plant Analysis Laboratory.
  store.extension.iastate.edu/Product/Soil-sample-information-sheet-for-horticulture-crops

- Soil Quality in Organic Agricultural Systems, Kathleen Delate, ISU Extension and Outreach. Covers all topics from crop rotation to amendments.
  store.extension.iastate.edu/Product/Soil-Quality-in-Organic-Agricultural-Systems
MODULE 2: Composting

Narrative
Kansas State University Extension video series:
1. Composting: Making Black Gold. Watch this 4-minute video to learn the basics of composting.
   www.youtube.com/watch?v=t44o4tsgo_k
2. Composting: Troubleshooting Issues.
   www.youtube.com/watch?v=P1b7F92YzXk

Hands-on activity
Create your own compost.

Worksheet
• Questions About Composting, Linda Naeve and Richard Jauron, ISU Extension and Outreach. This publication answers some commonly asked questions about composting.
  store.extension.iastate.edu/Product/Questions-About-Composting-Reiman-Gardens

Additional resources
  academics.sru.edu/MacoskeyCenter/Publications/Composting_Booklet.pdf
This publication serves as a resource on composting for many incubators, including GoFarm Hawaii.

Iowa Master Gardener Program
www.mastergardener.iastate.edu
MODULE 3: Basic plant biology and nutrient management

Narrative

*Master Gardener Online Short Course Series*, Oregon State University. Register for the highly interactive online botany course free of charge. pace.oregonstate.edu/catalog/master-gardener-online-short-course-series

*The Wisconsin Master Gardener Program – Botany session*, University of Wisconsin Extension. This online course is recommended by The Iowa Master Gardener Program’s leaders. wimastergardener.org/?q=session1

Worksheet

• *The Organic Way-Plant Families*, Virginia Cooperative Extension. Producers should be knowledgeable about vegetable families as each one has its own cultural requirements, pollinating vectors and, most importantly, effective crop rotation plans. Here is a detailed table of vegetables. pubs.ext.vt.edu/2906/2906-1393/2906-1393.html

• *Planting and Harvesting Times for Garden Vegetables*, Richard Jauron, ISU Extension and Outreach. This guide can help northern, southern, and central Iowa vegetable growers schedule their plantings so space is used efficiently. Includes a staggered planting and harvesting chart for crops grown April through October. store.extension.iastate.edu/Product/Planting-and-Harvesting-Times-for-Garden-Vegetables

Additional resources

• *Growing Organic Vegetables in Iowa*, Kathleen Delate, ISU Extension and Outreach. Covers all topics related to organic vegetable production, including nutrient management. store.extension.iastate.edu/Product/Growing-Organic-Vegetables-in-Iowa

• *Nutrient Management for Commercial Fruit and Vegetable Crops in Minnesota*, University of Minnesota Extension. Recommendations for fertilizing fruit and vegetable crops should be based in part on soil test results. This bulletin gives fertilizer recommendations for efficient nutrient management. www.extension.umn.edu/garden/fruit-vegetable/nutrient-management-for-commercial-fruit-and-vegetables-in-mn/

MODULE 4: Irrigation

Narrative
Low-Cost Irrigation System, Natural Resources Conservation Service (NRCS). This document offers small-scale irrigation solutions (sprinkler and drip) for your farm.
www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1167473.pdf

Small Farm’s Irrigation Management Basics, Oregon State University. This document offers more detailed information.
smallfarms.oregonstate.edu/sfn/sp10IrrigationManagement

Hands-on activity
Assess water needs on a plot.
Set up drip tape or other irrigation system.

Worksheet
• Drip Irrigation Calculator, ISU Extension and Outreach Iowa Produce website. Found under “Production – Irrigation Calculator”. This spreadsheet will help calculate how many gallons of water to apply with drip irrigation. (For your information, this opens directly into an Excel sheet.)
www.iowaproduce.org/drip-irrigation-calculators

Additional resources
• Irrigation Scheduling and Tensiometer Tips for Trickle Irrigation, ISU Extension and Outreach - Iowa Produce website. Found under “Production – Irrigation Scheduling and Tensiometer Tips”.
www.iowaproduce.org/irrigation-scheduling-and-tensiometer-tips

• ISU Extension and Outreach Agricultural Engineering specialists are available as a resource. Since there is very limited field irrigation acreage in Iowa, ISU Extension and Outreach ag engineers are not heavily involved in this area. However, these specialists can provide helpful advice on irrigating a small area for food crops.

omall@iastate.edu
MODULE 7: Weed management

Narrative
*Sustainable Weed Management for Small and Medium-Scale Farms.* National Sustainable Agriculture Information Service, managed by NCAT. This publication discusses several strategies, both proactive and reactive, for managing croplands as alternatives to conventional tillage systems.

Hands-on activity
Walk through a plot. Identify weeds and discuss how to manage them.

Worksheet
  

Additional resources
- *Weed Management for Organic Farmers,* Kathleen Delate, ISU Extension and Outreach. This publication discusses a wide variety of tools and strategies to control weeds without using synthetic chemicals.
  
  [store.extension.iastate.edu/Product/Weed-Management-for-Organic-Farmers](http://store.extension.iastate.edu/Product/Weed-Management-for-Organic-Farmers)

- *Weed Management in the Home Garden,* Richard Jauron, ISU Extension and Outreach, explains three methods of weed control used for small-scale vegetable production, including mulch.
  
  [store.extension.iastate.edu/Product/Weed-Management-in-the-Home-Garden](http://store.extension.iastate.edu/Product/Weed-Management-in-the-Home-Garden)
MODULE 8: Disease control and plant pathology

Narrative
Western Sustainable Agriculture Research & Education Farm Internship Curriculum, Oregon State University Extension, 2007, contains information about plant pathogens. attra.ncat.org/intern_handbook/pathogens.html

Disease Management Tactics for Vegetables, Michigan State University Extension website. This posting reviews the principles of integrated disease management, and lists additional resources to help put together a disease management plan. msue.anr.msu.edu/news/disease_management_tactics_for_vegetables_webinar

Hands-on activity
Walk through a plot. Identify weeds and determine how to deal with them.

Additional resources
• Tomato Diseases and Disorders, Mark Gleason, ISU Extension and Outreach. Explores the symptoms and management of common problems for field and greenhouse tomatoes. store.extension.iastate.edu/Product/Tomato-Diseases-and-Disorders

• Plant and Insect Diagnostic Clinic – Plant Diseases, Iowa State University. Find a list of plant diseases, specific signs, symptoms, cycle and methods of control on this website. www.ent.iastate.edu/pidc

• Organic Guides for Vegetables, Cornell University. nysipm.cornell.edu/organic_guide/veg_org_guide.asp

2 Oregon has a comprehensive, holistic system to support beginning farmers. Rogue Farm Corps (http://roguefarmcorps.org) offers internship and training programs for beginning farmers, with support from Oregon State University Extension. OSU Extension provides several training programs, including an online course “Growing Farms: Successful Whole Farm Management” (https://pace.oregonstate.edu/catalog/growing-farms-successful-whole-farm-management) and a face-to-face classroom/hands-on program “Growing Agritreneurs” (extension.oregonstate.edu/sorec/grow-ag2015). Beginning farmers also have the opportunity to start their business in one of Oregon’s incubator farms such as Headwaters Farm incubator (http://emswcd.org/farm-incubator/headwaters-farm). “Friends of Family Farmers” helps farmers by advocating for farm-friendly policies, and supports access to land through iFarm Oregon (www.friendsoffamilyfarmers.org/ifarm/index.php?action=searchpage).

3 Monitor the ISU Extension and Outreach online store for further publications on specific crops, store.extension.iastate.edu.
MODULE 9: Season extension

Narrative

*Iowa High Tunnel Fruit and Vegetable Production Manual*, Linda Naeve, ISU Extension and Outreach. This workbook provides growers with information on how to use high tunnels effectively, enhance productivity and net income, and learn from the experience of other high tunnel users.

Additional resources

- **Lettuce Season Extension with Row Covers**, Vegetable Laboratory, ISU Extension and Outreach. This video produced by Ajay Nair, assistant professor and Extension specialist, and the lab staff shows the results of a study evaluating strategies; row covers and calcium chloride spray, to extend the season and grow a second crop.

CONTENT and OUTCOME

› Safety using farm equipment
› Basic maintenance
› Cost estimates
MODULE 12: Whole farm design and management

Narrative
The farm plan includes two basic requirements: rotating crops and building soil fertility (see Module 1). Putting this plan on paper is not only necessary for certification, but also helps track how well the plan is working.

Consider:
- Crop rotations,
- Double cropping and,
- Companion planning.

Farm structure: consider what is most efficient for the equipment that will be used and what makes the best use of the available human labor.

Consider:
- Raised beds,
- Rows (easiest if using mechanized equipment but wasteful of space) vs. blocks (not amenable to power equipment) and,
- Vertical structures (trellises) for vegetables such as peas, squash, tomatoes and other spreading plants.

Hands-on activity
Design a whole farm plan.

Worksheet
- Vegetable Garden Worksheets for Planning Your Home Garden, Vegetable Gardening Online. These free, downloadable worksheets help growers organize all aspects of their production from garden layout to planting, weeding, harvesting, composting and fertilizing. www.vegetable-gardening-online.com/vegetable-garden-worksheets.html

Additional resources
- Garden Planning Program, downloadable resources, Seed Savers Exchange. This planner makes it easy to lay out vegetable beds and includes information; required space, calendar, suggested rotation, etc., for more than 180 plants. gardenplanner.seedsavers.org/?_ga=1.104313344.1414845258.1422632078
- Worksheets, interactive planning worksheets, Cornell University. These worksheets help develop the foundation of a farm plan. www.nebeginningfarmers.org/farmers/worksheets-2/
TOPIC B: Post-harvest handling

The overall objective of this section is to help farmers handle products safely and efficiently after harvest.

Modules
Module 1: Harvesting and post-harvest handling
Module 2: Food safety
Module 3: Seed saving

Resources
ISU Extension and Outreach Food Safety website: www.extension.iastate.edu/foodsafety

Purple Pitchfork website. Chris Blanchard’s Business Tools for Farmers at www.purplepitchfork.com presents a list of helpful tools, as well as food safety and post-harvest handling resources. Subscribe to the newsletter to receive weekly updates and information.
MODULE 1: Harvesting and post-harvest handling

Narrative
Post-harvest handling is the stage of crop production that includes cooling, cleaning, sorting and packing the crop for later stages in the process (storage, transportation, delivery). How a product is handled during this crucial period largely determines its quality and safety for consumption. This module is mostly hands-on.

Hands-on activity
Walk through and visual assessment of harvesting readiness.

Additional resources
- *Harvesting and Storing Vegetables*, Linda Naeve and Richard Jauron, ISU Extension and Outreach. This publication provides detailed information on how to store more than 30 types of vegetables, including recommended storage temperatures, humidity, storage life, and suggested methods for extended preservation.
  
  store.extension.iastate.edu/Product/Harvesting-and-Storing-Vegetables

- *Grower’s Manual: A Template for Grower Cooperatives*, Leopold Center for Sustainable Agriculture. Joanna Hamilton’s manual was adapted from a guide developed by GROWN Locally, a producer cooperative in northeast Iowa. This manual serves as a model to establish standards for pre- and post-harvest practices and the product specifications used with local foodservice establishments.
  

- *Post-Harvest Handling Decision Tool*, Leopold Center for Sustainable Agriculture. Each crop has an ideal range for storage temperature and humidity. Chris Blanchard’s online tool describes handling systems for different groups of crops and general considerations for designing your own post-harvest handling system.

MODULE 2: Food safety

Narrative
Iowa State University created an online food safety training course for farmers who sell products to farmers markets.

www.safeproduce.cals.iastate.edu/training

Best Practices Safe Food Handling on the Farm, ISU Extension and Outreach. Cathy Strohbehn's comprehensive presentation gathers food safety information for producers who want to sell food at farmers markets.
iastate.app.box.com/s/igdkp6ibf948182kseyr

Worksheet

- **On-farm Food Safety: Food Handling Guide**, Catherine Strohbehn, Margaret Smith, Paul A. Domoto, and Lester Wilson, ISU Extension and Outreach. This is a guide for safe food handling habits related to health, hygiene and hand washing.
  store.extension.iastate.edu/Product/On-farm-Food-Safety-Food-Handling-Guide

- **On-farm Food Safety: Guide to Good Agricultural Practices**, Catherine Strohbehn, Dan Henroid, Jason Ellis, and Lester Wilson ISU Extension and Outreach. This guide offers a blueprint for developing an on-farm food safety plan that documents your risk reduction efforts.
  store.extension.iastate.edu/Product/On-farm-Food-Safety-Guide-to-Good-Agricultural-Practices-GAPs

- **On-Farm Food Safety: Cleaning and Sanitizing Guide**, Catherine Strohbehn and Paul A. Domoto, ISU Extension and Outreach. This guide provides suggested checklists, procedures and schedules for documenting food safety plans.
  store.extension.iastate.edu/Product/On-farm-Food-Safety-Cleaning-and-Sanitizing-Guide

MODULE 3: Seed saving

Narrative
Seed Savers, an extraordinary nonprofit organization based in Northeast Iowa, is planning to conduct an online seed saving class that will be available in fall 2015.

Hands-on activity
Seed saving

Worksheet
• Seed Savers Exchange Seed Saving Chart

Additional resources
• Seed Savers Exchange
  ♦ The Seed Garden: The Art and Practice of Seed Saving will be an excellent resource for both beginning farmers and advanced seed savers. The book has over 250 color photographs that clearly illustrate the different techniques that can be used when saving seeds.

TOPIC C: Business planning and basic farm finances

The objectives of this section are to: 1) build a business plan for a successful farm, and 2) gain a basic understanding of farm finances to identify the best tools to farm profitably.

Modules
Module 1: Starting out with financial management – Why is it important?
Module 2: Writing a business plan (Part 1/3) – History and current situation: What do you have to work with?
Module 3: Writing a business plan (Part 2/3) – Vision, mission and goals: Where do you want to go?
Module 4: Writing a business plan (Part 3/3) – Strategic planning and evaluation: What routes will take you where you want to go?
Module 5: Farm data collection and organization tools
Module 6: Organizing basic financial information
Module 7: Financing from loan providers and agencies

Resources
• Building a Sustainable Business, A Guide to Developing a Business Plan for Farms and Rural Businesses. This SARE publication developed by the Minnesota Institute for Sustainable Agriculture (MISA) (2010) is available free online at www.sare.org/Learning-Center/Books/Building-a-Sustainable-Business. This publication is used as a reference by many programs, including Practical Farmers of Iowa's (PFI) Saving Incentive Program. Those who use this book to build a business plan appreciate its logical flow and systems perspective.
• AgPlan. The Center for Farm Financial Management (Ag-Value Added Business Plan) provides this free online business plan that is used by several farm training programs, including Annie’s Project.6 agplan.umn.edu
• Fearless Farm Finances, Midwest Organic & Sustainable Education Service. This unique resource is packed with instructions, tips and tools for a successful farm financial system. mosesorganic.org/fearless-farm-finances
• Small Business Association (SBA) contains many resources, including a wealth of information and guides to writing a business plan. www.sba.gov/writing-business-plan
• Beginning Farmer Business Planning, Marketing, Sheep, Goat and Poultry Resources. NCAT-ATTRA. This website assembles narrated presentations. At the end of the 4-part series, users should have outlined the skeleton of a business plan. attra.ncat.org/oasdfr

6 www.extension.iastate.edu/annie/
MODULE 1: Starting out with financial management

Narrative

*Building a Sustainable Business*, SARE. Task 1: identify your values and what is important to you. Think about what your interests are and why/what you want to farm.

Worksheet

- *Building a Sustainable Business*, SARE. Worksheet pages 24-25 will assist in identifying values.

Additional resources

- *Fearless Farm Finances*, MOSES. Section 1: Financial management: getting a grasp on startup finances and setting goals. [mosesorganic.org/fearless-farm-finances](https://mosesorganic.org/fearless-farm-finances)

MODULE 7: Financing from loan providers and federal agencies

Narrative
Appendix C. Financial Assistance for Farmers, Andy Hunziker, Farm Loan Manager, Farm Service Agency. Presentation to ISU’s Horticulture Enterprise Management class covers different financial assistance programs for farmers.

www.extension.iastate.edu/localfoods/beginning-farmer-resource-guide

Additional resources
• Farm Loan Programs, U.S. Department of Agriculture publishes a guide to the different direct and guaranteed loan programs available through the Farm Service Agency (simplified chart appears on p. 12-13).

CONTACT
Contact your local Farm Service Agency county office.
Find it here: http://offices.sc.egov.usda.gov/locator/app
This guide includes resources provided by university extension programs and agricultural organizations. Thanks to the following for allowing use of these publications and online resources.

**Topic A: Production**

**Module 1 – Soil health**

**Module 2 – Composting**

10. “Composting: Troubleshooting Issues,” Kansas State Research and Education Youtube channel, last modified March 7, 2013. [https://www.youtube.com/watch?v=P1b7F92YzXk](https://www.youtube.com/watch?v=P1b7F92YzXk).

Module 3 – Basic plant biology and nutrient management

Module 4 – Irrigation

Module 5 – Planting

23. New Entry Sustainable Farming Project, “How to Plant Vegetables.” Factsheet available on the National Incubator Farm Training Initiative website, accessed on May 30, 2015, 
nesfp.nutrition.tufts.edu/sites/default/files/resources/spreadsheet_of_how_to_plant_vegetable_crops_-_june.pdf.

24. Chris Blanchard, Transplant Production Decision Tool, Leopold Center for Sustainable Agriculture, January 2013, 

25. Richard Jauron, Planting a Home Vegetable Garden, Iowa State University Extension and Outreach, PM 0819, January 2013, 
https://store.extension.iastate.edu/Product/Planting-a-Home-Vegetable-Garden.

Appendix C: Food Service Agency
**Financial assistance for farmers**
Compiled by
Andy Hunziker, farm loan manager, Boone County Farm Service Agency, Boone, Iowa
Appendix II: Organizations and programs that support beginning farmers

1A. Formal training in academia

**College courses:**

- **Iowa Valley Community College:** *Entrepreneurial and Diversified Agriculture*—
  [https://mcc.iavalley.edu/academic/agriculture-animal-science/entrepreneurial-ag](https://mcc.iavalley.edu/academic/agriculture-animal-science/entrepreneurial-ag).

- **Iowa Western Community College:** *Dream to farm*—

- **Indian Hills:** *Sustainable Agriculture and Entrepreneurship*—
  [http://www.indianhills.edu/courses/tech/sustainableagriculture.html](http://www.indianhills.edu/courses/tech/sustainableagriculture.html).

- **Iowa State University courses:**
  *Hort 465 (Horticulture Enterprise Management)*
  *Hort 471 (Vegetable Production and Management)*

1B. Online courses and webinars

**Webinars (Iowa):**

- **Practical Farmers of Iowa (PFI):** *Farminars*—

- **ISU Extension and Outreach:** *Small Farm Sustainability*—
  [http://www.extension.iastate.edu/smallfarms](http://www.extension.iastate.edu/smallfarms).

**Online courses (out of state):**

- **Oregon State University Extension:** *Growing Farms*—
  [https://pace.oregonstate.edu/catalog/growing-farms-hybrid-course-beginning-farmers](https://pace.oregonstate.edu/catalog/growing-farms-hybrid-course-beginning-farmers).

- **Cornell University Cooperative Extension:**
  *Beginning Farmer Program*—

- **University of Vermont Extension:** *Growing places*—

**Other:**

- **Land Stewardship Project:** *Farm Beginnings Program*—
  [http://landstewardshipproject.org/morefarmers/farm](http://landstewardshipproject.org/morefarmers/farm).
2A. Gaining practical experience

**Internships:**
- Labor4Learning (Practical Farmers of Iowa): *Entrepreneurial and Diversified Agriculture*—
- The Farming Institute: 2-month immersion program with field and classroom learning.

**Mentorship and apprenticeships:**
- Women Food & Ag Network (WFAN): *Harvesting our potential*—
- Iowa State University courses:
  Hort 465 (Horticulture Enterprise Management)
  Hort 471 (Vegetable Production and Management)

2B. Try it out!

**Farm incubators:**
One or more parcels of land where one or multiple producers are farming and marketing farm products through their own farm business enterprise, often with organizational access to training/technical assistance opportunities on farm business and production practices.
- **National Incubator Map**—

**In Iowa:**
- Global Greens—
- Others in the works… show your interest!!
  topaloff@iastate.edu.

3A. Build a business plan—Courses

**Local courses/training (see block 1B):**
- Annie’s Project: *Risk Management Education for Farm and Ranch*—
  [http://www.extension.iastate.edu/annie/IowaAnnie.html](http://www.extension.iastate.edu/annie/IowaAnnie.html).

**Online training courses:**
- Center for Farm Financial Management—
3B. Build a business plan—Resources

- ISU Extension and Outreach: Writing a business plan—
  http://www.extension.iastate.edu/agdm/wholefarm/html/c5-68.html.

- University of Minnesota: AgPlan—

- PFI’s resource guide to business planning—

4A. Access to capital

- FSA Beginning farmer loans—

- FSA Microloans—

- Beginning farmer tax credits: Incentive to lease, sell or custom hire a beginning farmer—
  http://iowafinanceauthority.gov/Public/Pages/PC204LN48.

- PFI: Saving Incentive Program—

4B. Access to land

- Beginning Farmer Center: Legal resource and matching program—Aglink—
  http://www.extension.iastate.edu/bfc/farm.

- PFI: Find A Farmer—
  https://www.findafarmer.net.

Tip: “Networking, talking and engaging with your community will increase your chances of finding something you want.”—Dave Baker, ISU Beginning Farmer Center.
