

MyPlate Reference

MyPlate assigns individuals to a calorie level based on their sex, age, and activity level. The chart below identifies the calorie levels for males and females by age and activity level. Calorie levels are based on the Estimated Energy Requirements (EER) and activity levels come from the Institute of Medicine Dietary Reference Intakes Macronutrients Report, 2002.

SEDENTARY

Less than 30 minutes a day of moderate physical activity in addition to daily activities.

MODERATELY ACTIVE

At least 30 minutes up to 60 minutes a day of moderate physical activities, such as walking briskly, mowing the lawn, dancing, swimming for recreation, or bicycling in addition to daily activities.

ACTIVE

60 or more minutes a day of moderate physical activity in addition to daily activities.

MyPlate Food Intake Patterns

Nutrient and energy contributions from each group are calculated according to the nutrient-dense forms of food in each group (e.g., lean meats and fat-free milk).

Daily Amount of Food From Each Group												
Calorie Level ¹	1000	1200	1400	1600	1800	2000	2200	2400	2600	2800	3000	3200

2 Grains Group includes all foods made from wheat, rice, oats, cornmeal and barley, such as bread, pasta, oatmeal, breakfast cereals, tortillas, and grits. In general, 1 slice of bread, 1 cup of ready-to-eat cereal, or ½ cup of cooked rice, pasta, or cooked cereal can be considered as 1 ounce equivalent (oz-eq) from the grains group. At least half of all grains consumed should be whole grains.

3 Vegetable Group includes all fresh, frozen, canned, and dried vegetables and vegetable juices. In general, 1 cup of raw or cooked vegetables or vegetable juice, or 2 cups of raw leafy greens can be considered as 1 cup from the vegetable group. Note these recommendations for types of vegetables to include weekly.

4 Fruit Group includes all fresh, frozen, canned, and dried fruits, and fruit juices. In general, 1 cup of fruit or 100% fruit juice, or ½ cup of dried fruit can be considered as 1 cup from the fruit group.

5 Milk Group includes all fluid milk products and foods made from milk that retain their calcium content, such as yogurt and cheese. Foods made from milk that have little or no calcium, such as cream cheese, cream, and butter, are not part of the group. Most milk group choices should be fat-free or low-fat. In general, 1 cup of milk or yogurt, 1 ½ ounce of natural cheese, or 2 ounces of processed cheese can be considered as 1 cup from the milk group.

6 Meat and Beans Group in general, 1 ounce of lean meat, poultry, or fish, 1 egg, 1 tablespoon peanut butter, ¼ cup cooked dry beans, or ½ ounce of nuts or seeds can be considered as 1 ounce equivalent (oz-eq) from the meat and beans group.

7 Oils include fats from many different plants that are liquid at room temperature, such as canola, corn, olive, soybean, and sunflower oil. Some foods are naturally high in oils, like nuts, olives, some fish, and avocados. Foods that are mainly oil include mayonnaise, certain salad dressings, and soft margarine.

8 Discretionary Calories are those that remain after meeting the recommended food intake pattern — provided that you eat foods that are fat-free and with no added sugars. If you eat high fat or high sugar forms of food from the different food groups your discretionary calories allowance will have already been used.
